

FARADAY BARR FATAHILLAH

+6281282658563 | faradaybarrf@gmail.com | www.linkedin.com/in/faradaybarr | <https://github.com/FaradayB>

Computer engineering graduate honored as the highest GPA achiever in the major. with experience in AI, embedded computing, and software development. Published international papers as researcher.

Education Level

Telkom University - Bandung, Indonesia

Sep 2021 - Aug 2025

Bachelor of Computer Engineering, 3.88/4.00

- Achieved highest GPA in the major and 3rd highest in the faculty.
- Appointed as an Assistant Coordinator of a Teaching Lab.
- Appointed as a Mentor in my Major's Orientation Program.
- Attended Google's Dev Fest 2023 in Bandung as a participant.
- Became Group Leader of most Team Projects.
- Joined Machine Learning and Game Developments Study Groups.
- Created a Fall Detection system using YOLO Model and integrate it with an android app complemented with a smart system to use home devices using voice command for my thesis.
- Published a research paper and became a speaker in 8th IC2IE with "YOLOv8 vs Faster R-CNN for Fall Detection: Effects of Learning Rate and Dataset Configuration" as the title of the research.

Personal Experiences

Telkom University - Bandung, West Java, Indonesia

Sep 2024 - Aug 2025

Teaching Assistant

Computer Engineering Department, Faculty of Electrical Engineering, Telkom University

- Became teaching assistant for Power Supply Design, Internet of Things, Discreet Math, Mathematical Logic, and Control System collectively for 1 year.
- Direct and assists students in completing exercises in class.
- As lecture assistant, I helped with developing course materials, course assessments, and grading.
- Managed all information given to class via Microsoft Teams.
- Answered student's questions related to academic and non-academic.

i-Smile Laboratory - Bandung, Indonesia

Jul 2024 - Jul 2025

Deputy Assistant Coordinator

A Laboratory at Telkom University in Computer Engineering that specializes in Artificial Intelligence and Machine Learning

- Instructed Artificial Intelligence Practicum with materials and hands-on using Python 7 times biweekly for 4-5 students per session.
- Become the coordinator for the laboratory study group that and helped more than 50 students learn basic machine learning and data prediction.
- Assist lab project demo in Himpunan Mahasiswa Teknik Komputer's (HMTK) event on high school student visit to campus.

Bangkit Academy

Sep 2024 - Dec 2024

Machine Learning Cohort

Academic bootcamp led by Google, Tokopedia, Gojek, & Traveloka that focus on improving technological career-readiness

- Developed SugarCare, a diabetes tracking and prediction mobile app, which received high marks in the capstone project.
- Recognized as an Active Participant in the Machine Learning track for consistent engagement and contributions.
- Gained knowledge and experience in data science, data analysis, machine learning, deep learning, and Generative Adversarial Networks (GANs).

Kereta Api Indonesia (KAI) - Bandung, West Java, Indonesia

Jul 2024 - Aug 2024

Public Relations Intern

Indonesia's state-owned enterprise that focus on trains and railway operations

- Learned React and Bootstrap to developed a website frontpage showing Bandung railway station historical information.
- Initiated the UI/UX design of the website.
- Perform photography, photo editing, videography, video editing, content creation, and produce news internally

Telkom University

Feb 2024 - Aug 2025

Member of Lecturers Research

Computer Engineering Department, Faculty of Electrical Engineering, Telkom University

- Acted as student's lead for two lecturers research teams in inventory management research and fall detection research.
- Developed an application for inventory management research using Android Kotlin and led the experiment of the developed inventory

management system.

- Assists hardware team and software team in fall detection research by answering questions, knowledge transfer, and debug.

SEA Laboratory - Bandung, Indonesia

Jul 2023 - Jun 2024

Assistant Coordinator

A Laboratory at Telkom University in Computer Engineering Major that specializes in software and application development such as Web, Desktop, Game, and Mobile applications

- Led a team of 15 teaching assistant and mentored more than 250 students in Object Oriented Programming (OOP) and Programming Algorithm practicums.
- Established a dynamic study group for participants to learn Web Development, Game Development, Desktop Development, Mobile Development, and Python programming fundamentals.
- Mentor of Mobile Development Study Group and helped students with basics of Android Studio applications development.

Organizational Experiences

Himpunan Mahasiswa Teknik Komputer (HMTK) - Bandung, West Java

Dec 2024 - Aug 2025

Head of Academics and Profession Department

Student body for Computer Engineering major.

- Managed and monitor members performance in department activities.
- Monitored organization exam study group, company visit, and high school visit to campus.
- Tutor substitute in organization exam study group.
- Participate in three company visit as both Head of Academics and Profession Department and Teaching Assistant.
- Become the student coordinator for all three company visit ensuring students safety and comfort.
- Assist the speaker hands-on activity using Tinkercad by leading the team to assists visitors.

OVERCLOCK 2023

Nov 2023 - Nov 2024

Member of Student Relations Fasillities (SRF)

Student orientation event for freshmen

- Became the member of SRF to lead 16 participants in HTMK's orientation program.
- Appointed as the team secretary.
- Manage and deliver information and assignment to all team member and participant.
- Take notes and evaluation for each meeting with other division.
- Substitute as the SRF coordinator when the real coordinator is absent.

AWS Gen-AI Tour

Aug 2024

Organizer

Global pop-up event by Amazon Web Services that brings hands-on workshop, demos, and expert guidance to help developers and startups learn, build, and innovate using generative AI.

- Lead student organizer team that consists of Binus University Bandung team and Telkom University Bandung team.
- Communicate and participate in discussion with head organizer.
- Became the lead technical operator.
- Managed speakers materials and event activities using Open Broadcaster Software (OBS).

Additional

- **Soft Skills:** Adaptive, Communication, Critical Thinking, Flexible, Leadership, Problem Solving, Project Management, Teamwork, Team Management, Time Management
- **Hard Skills:** Arduino, ESP32, YOLO, Python, TensorFlow, PyTorch, Scikit-learn, Pandas, Numpy, Jupyter Notebook, Android Studio, Basic Linux Operation, C Language, MySQL, HTML, CSS, Bootstrap, React, Tailwind
- **Language:** Fluent in English, Native proficiency in Indonesian
- **Certification** (2024): Generative AI for Everyone, DeepLearning.AI TensorFlow Developer Specialization, Structuring Machine Learning Projects, Machine Learning Specialization, Dicoding Belajar Dasar Visualisasi Data, Dicoding Belajar Machine Learning untuk Pemula, Dicoding Memulai Pemrograman dengan Python
